CS471: Operating System Concepts

Spring 2008

Guidelines for Final Examination

Date: May 1, 2008 (Thursday)

Time: 12:30-3:30 PM

Place: In class (Hughes 1117)

Points: 150

Chapters covered: 11, 12, 14, 15, 17, 18

Number of questions: 6 (One from each chapters).
Each question will have several parts.

Type of questions: Some can be answered in one line. Others may need some explanation. Some involve numerical computations.

There is a tendency for some students to write pages and pages when the answer is just one line. So answer only what is asked, not all that you know. The space provided for each question is adequate. If you need more, use the white space provided at the back of each page.

Unless arranged well in advance, no make-up test will be provided. So if you cannot take the test at the specified time and day, let me know well in advance so you can take the exam earlier.
